DETAILED ACTION

Defective Appeal Under 37 CFR 1.192

1. Appellant's brief, filed 05/03/2004, is defective because the requirements of 37 CFR 1.192 have not been met.

Specifically, MPEP 1206 (5) requires that applicant provide a concise explanation of the invention defined in the claims involved in the appeal, which shall refer to the specification by page and line number, and to the drawing, if any, by reference characters.

Further, MPEP 1206 (8)(iv) requires that for each rejection under 35 USC 103, the argument shall specify the errors in the rejection and, if appropriate the specific limitations in the rejected claims which are not described in the prior art relied on in the rejection, and shall explain how such limitations render the claimed subject matter unobvious over the prior art. If the rejection is based upon a combination of references the argument shall explain why the references, taken as a whole do not suggest the claimed subject matter, and shall include, as may be appropriate, an explanation of why features disclosed in one reference may not be properly combined with features disclosed in another reference. A general argument that the limitations are not described in a single reference does not satisfy the requirement of this paragraph.

Specifically, argument A is to a rejection involving Dolan, not associated with group I and is, therefore, confusing. and argument B appears to be to claims 1, 6-7, also not a specified grouping.

Art Unit: 3629

2. Applicant is given 1 month to reply to this Notice of Defective Appeal Brief.

Extensions of time may be obtained under 37 CFR 1.136(a).
